*The transition to a sustainable economy is not sustainable:
an ecological macroeconomic analysis of climate policy, the circular economy, and global
inequality*

Oriol Vallès Codina, José Bruno R. T. Fevereiro, Andrea Genovese,
Annina Kaltenbrunner, Effie Kesidou, Marco Veronese Passarella

The authors suggest the following reviewers as having relevant expertise in ecological macroeconomics, post-Keynesian modelling, input-output analysis, and circular economy policy. None of the suggested reviewers have a conflict of interest with the authors or this manuscript.

Reviewer	Details
Dr. Guilherme Spinato Morlin	Expertise in post-Keynesian macroeconomics, income distribution, and ecological macroeconomic modelling. Relevant to the SFC dynamics and distributional analysis of the paper.
Dr. David Cano	Expertise in input-output analysis and environmental economics. Relevant to the MRIO accounting framework and ecological footprint methodology.
Dr. Giuliano Yajima	Expertise in stock-flow consistent modelling, open-economy macroeconomics, and international monetary economics. Relevant to the two-region SFC structure and cross-border transmission analysis.
