

Circular Economy Intervention Comparison | Cross-Border Effects (RoW)

Shock Parameter . = 0.2 (0.05 for Construction, Sc5 & Sc14)

- Scenario**
- Scenario 1 | Final Demand
 - Household Consumption | Food Shift
 - Scenario 2 | Final Demand
 - Household Consumption | Energy Shift
 - Scenario 3 | Final Demand
 - Household Consumption | Wood Shift
 - Scenario 4 | Final Demand
 - Government Consumption | Plastics Shift
 - Scenario 5 | Final Demand
 - Firm Fixed Investment | Construction Shift
 - Scenario 6 | Final Demand
 - Firm Fixed Investment | Metal Shift
 - Scenario 7 | Intermediate Demand
 - Firm Production | Wood Shift
 - Scenario 8 | Intermediate Demand
 - Firm Production | Pulp Shift
 - Scenario 9 | Intermediate Demand
 - Firm Production | Plastics Shift
 - Scenario 10 | Intermediate Demand
 - Firm Production | Metal Shift
 - Scenario 11 | Intermediate Demand
 - Firm Production | Glass Shift
 - Scenario 12 | Intermediate Demand
 - Firm Production | Cement Shift
 - Scenario 13 | Intermediate Demand
 - Firm Production | Energy Shift
 - Scenario 14 | Intermediate Demand
 - Firm Production | Construction Shift
