

Cross-Border Asymmetries of Circular Economy Scenarios

Long-term (t+20) % deviations from baseline. Each point = one CE scenario. Halo colour = transmission pattern.
Upper-left quadrant: EU contracts, RoW expands. Lower-right: EU expands, RoW contracts. Bottom-right: dual inequality (wage share vs public debt).

Transmission Pattern

- Fossil Import Collapse
- Competitive Displacement
- Production Leakage
- Construction Rebound
- Symmetric Contraction

Scenario

Final Demand	Intermediate Demand
1 Food HH	7 Wood Int
2 Energy HH	8 Pulp Int
3 Wood HH	9 Plastics Int
4 Plastics Gov	10 Metal Int
5 Construction Inv	11 Glass Int
6 Metal Inv	12 Cement Int
	13 Energy Int
	14 Construction Int
